Prepping your boat for Winter Storage

Rodent infestation can be a problem with boats stored for extended periods. Since the vast majority of boats are stored outside, little can be done to prevent them from entering the boat. However, to mitigate any potential damage, we will leave rodent poison (one dose in runabouts and two in pontoon boats) in all stored boats this year unless instructed otherwise before wrapping. Also, please remove your Bimini fabric and boat cover (not the frame) and any other items that might be used as nesting material, such as life jackets, towels, inflatable toys, plastic cups or utensils, sunscreen, etc.

Winterization Service

Includes the following:

- Disconnect battery terminals
- Change lower gear oil and check for water intrusion
- Change motor oil and filter using OEM quality lubricants and filters
- Stabilize fuel for storage
- Fog carburetor/fuel system and internal engine components
- Purge water and add non-toxic antifreeze to block & manifolds
- Tape prop
